

121-G12
Fall, 2012
Midterm

Name _____

1. Solve for x .

a. $\frac{2x - 6}{x} = \frac{x - 3}{x + 1}$.

b. $|x - 4| = 8$

c. $|x - 4| > 8$

2. If I buy a 2012 Tacoma for \$33,000 and that price includes 6% sales tax, then how much does the truck cost *before* sales tax?
3. Jim can paint the room in 9 hours. It takes Jenny 7 hours to paint the room. How long does it take the two of them to paint the room if they work together?
4. Suppose Jenny shows up at 10 a.m. (2 hours late!) and Jim's been painting the room for 2 hours, already. When is the paint job finished? Give your answer to the nearest minute, for full credit.

5. Write the quadratic function $f(x) = x^2 - 10x + 21$ in the form $y = a(x - h)^2 + k$ and sketch its graph. Your graph should be “true to the essence of the parabola” and include the following points, clearly labeled as ordered pairs on the graph (and this is the last time I’m telling you how to label key points).
- Vertex
 - Any x - and y -intercepts
6. Write an equation of the line through the points $P(5, 3)$ and $Q(-3, 9)$. Express the equation in all three forms:
- Point-Slope
 - Slope-Intercept
 - Standard

7. Write an equation in point-slope form of the line through $P(3, -7)$ that is parallel to the line $y = \frac{2}{7}x + \frac{11}{97}$

8. Solve for x :

a. $2x^2 - 3x - 9 = 0$

b. $2x^2 - 3x - 9 > 0$

9. Let $f(x) = \frac{x+5}{x-7}$ and $g(x) = \sqrt{x+3}$.

a. What is the domain of f ?

b. What is the domain of g ?

c. What is $f \circ g$ and what is its domain?
