I *want* to cover vectors, but we may need to cover conics in Chapter 5, instead. So Sections 3.3 and 3.4 may be replaced by topics in Chapter 5. Speaking as someone who's looking ahead to Calculus, I'm partial to giving students prior exposure to angles between vectors, via Law of Cosines and dot product. But the college may want us to cover topics in Chapter 5, instead.

This is the first semester without a separate Finals Week, so I'm not sure when we will take Test 5. We will certainly meet, but if the test is Tuesday, and you have a day to give on attendance grade, maybe that's all that missing Thursday would cost you.
