There's a lot of nonsense about memorizing the 12-point unit circle. Learn the 0-degree, 30-degree, 45-degree and 60-degree right triangles in Quadrant I. Then *reason* your way to the other 3 quadrants.

PLEASE NOTE: I'm postponing 1.2 until we've finished 1.3 and 1.4. I dislike the sequencing, there.

I want your right-angle trigonometry to be **STRONG** before we get into the more general stuff.
