There's a lot of drill-and-kill about memorizing the 12-point unit circle in the book. Instead, learn the 0-degree, 30-degree, 45-degree 60-degree , and 90-degree right triangles in Quadrant I. *Reason* your way to the rest!

PLEASE NOTE: I'm postponing 1.2 until we've finished 1.3 and 1.4. I dislike the sequencing, there.

I want your right-angle trigonometry to be STRONG before we get into the more general stuff.
