

Today Is Test Day

You have one more week to request a ,midterm re-take.

Thursday, we begin Chapter 4: Integral Calculus!

I'll start posting videos for the day that are tied to the schedule and the assignment.

They'll go into the Lecture Notes and Videos, as before, but they won't be live sessions.

I think that will make your learning more efficient.

It's working well for my Differential Equations cohort.

Live Lecture is best only when everyone's on the same page. Otherwise it's a waste of time for those who are ahead and those who are behind. I throw each a bone and miss the middle...
